

Improving beverage logistics with reusable transport packaging

BPP i9

Endur S7.2

Endur i7

Designed for high-volume, circular and automation-ready beverage supply chains

Beverage supply chains operate in high-volume, fast-moving logistics environments where transport efficiency, packaging availability and retail replenishment reliability are critical to performance.

From beverage production and warehousing to distribution centres and retail networks, companies need logistics systems that support repetitive flows, standardised handling, load stability and stronger visibility across reusable packaging assets.

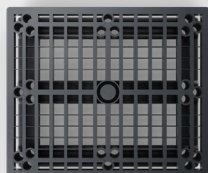

Cabka's reusable transport packaging portfolio — including plastic pallets, pallet boxes and foldable large containers — helps beverage companies improve asset utilisation, support circular logistics, optimise transport operations and reduce the operational complexity of high-frequency distribution flows.

> Key Benefits

- > **High-Volume Distribution Efficiency:** Designed to support intensive beverage distribution flows where speed, consistency and transport optimisation are essential.
- > **Load Stability & Handling Performance:** Help improve operational reliability across production, warehousing and retail replenishment
- > **Automation-Ready Logistics:** Compatibility with automated warehouses, robotic handling systems and high-throughput logistics operations.
- > **Asset Visibility & Traceability:** Support packaging tracking, visibility initiatives and stronger control of reusable transport assets across beverage **supply chains**.
- > **Cost-Per-Trip Optimisation:** Durable RTP systems designed for repeated circulation help improve lifecycle performance and reduce the cost impact of packaging inefficiency over multiple trips.

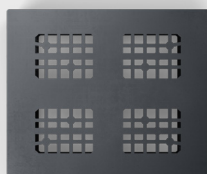

Beverage Product Offering

> Endur S7.2

Heavy duty pallet in 1250x1050mm with 5 runners and an open deck designed for high-rotation usage in open or closed pools.

↔ Size	1250x1050mm
🚚 Rack	1250 kg
🚚 Static	4000 kg
🚚 Dynamic	1500 kg

> BPP i9

Custom pallet with 6 runners that redefined the European beverage industry. It is optimized to handle heavy loads in high rack applications with unparalleled efficiency.

↔ Size	1200x1000mm
🚚 Rack	1500 kg
🚚 Static	7000 kg
🚚 Dynamic	1500 kg

> Endur i7

Heavy-duty pallet with 3, 5 or 6 runners and a closed or open deck, engineered for maximum impact resistance and high-performance in demanding environments.

↔ Size	1200x1000mm
🚚 Rack	1250 kg
🚚 Static	6000 kg
🚚 Dynamic	2500 kg

Why Beverage Leaders Choose Cabka:

- > High-volume retail replenishment
- > Warehouse automation requirements
- > Asset recovery and reverse logistics
- > Traceability and regulatory compliance
- > Cost-per-trip optimisation
- > Circular packaging targets
